Summary

"I'm a passionate Front-End Software Engineer with over 1 year of experience crafting user-centric web applications. I am proficient in JavaScript, React.js, and Next.js. I specialize in React, emphasizing performance optimization and accessibility. Additionally, I have experience working with Node.js for backend development, building APIs and server-side logic. I thrive in collaborative environments, keep up with industry trends, and am passionate about creating exceptional digital experiences.

Experience

Next Pak agile solution | Rawalpindi, Punjab

React JS Developer | 07/2022 - Present

- Drive the development of high-quality, scalable, and maintainable front-end code.
- Architect and design robust and efficient frontend solutions using React js and Next Js.
- Implement and enforce coding standards to maintain a high level of code quality.
- Optimize the performance of web applications, ensuring fast and responsive user interfaces.
- Collaborate on API design and communication protocols between the frontend and backend systems.

Apna Devs Islamabad | Islamabad, Punjab

Frontend Developer (React Js)(Internship) | 04/2022 - 06/2022

- Utilize frontend frameworks such as React js to build dynamic and interactive web applications.
- Ensure cross-browser compatibility and optimize applications for various devices and screen sizes.
- Collaborate on API design and implement efficient communication between the front end and back end.
- Participate in the identification and resolution of bugs, as well as ongoing maintenance of existing frontend code.
- Use version control systems such as Git to manage and track changes to the codebase.
- Stay informed about the latest trends and advancements in frontend development.

Projects

Air Casita:

- Developed using Next.js, React.js, Tailwind CSS, and integrated APIs for property listings and bookings.
- Led front-end development to ensure seamless user experience and high performance.
- Implemented features such as property search, booking calendar, and user authentication for Airbnb-like functionality.

Tissume:

- Built with React.js, Tailwind CSS, and integrated with React Router DOM for navigation.
- Translated Figma design mockups into interactive React components for consistent UI.
- Implemented features for appointment scheduling, user profile management, and real-time notifications.

Psychplus:

- Tech Stack: Next Js , redux Ui , axios , TanStack query, ReactHook Form.
- Domain: Medical/Healthcare.
- Reliable Performance: Manages patient records efficiently.
- Facilitates scheduling and appointment booking.
- Handles various medical-related tasks seamlessly.

Food Tracker

- Developed using React.js, and Bootstrap, and integrated with Firebase for backend services.
- Utilized Apex Charts for data visualization to track dietary intake and monitor nutritional goals.
- Features include meal logging, protein consumption tracking, nutritional goal setting, and personalized recommendations.

Skills

JavaScript, React JS, Typescript, Node js, express js , React router DOM, Redux, Redux toolkit, API Integration, GitHub, Bitbucket, Git, Tailwind, Bootstrap, Material UI., Next js, Tanstack query, ReactHook form

Education

Virtual University of Pakistan | Islamabad, Punjab
Computer Sciences | 02/2022
